REPLY TO  
ATTN OF: ERD:BRL:8104SUBJECT: Technical Memorandum 1, Final Phase II RFI/RI Work Plan (Alluvial), 903 Pad,  
Mound, and East Trenches Areas, Operable Unit No. 2

TO: Autar Rampertaap, EM-453

Attached please find two (2) copies of the "Technical Memorandum 1, Final Phase II RFI/RI Work Plan (Alluvial), 903 Pad, Mound, and East Trenches Areas, Operable Unit No. 2". This document has been submitted to the local regulatory agencies as a technical memorandum pursuant to the IAG. Major scope reductions have been incorporated into this document, thereby requiring the second approval as a technical memorandum. These scope changes primarily encompass the reduction of drilling from 209 to 109 locations and the reduction of analytical samples collected from 50% to 25%, depending upon the analyte. These changes were made possible by taking a more technical approach to implementing the investigation while still obtaining the objectives.

If you have any questions concerning this document, please contact Brent R. Lewis of my staff at FTS 345-4765.
